## PROFESSIONAL SUMMARY

I'm a UX/UI designer with a solid foundation in Art Direction within the advertising industry. My background equips me with a strategic mindset and a strong sense of aesthetics, enabling me to conceptualize and execute design solutions that align with brand identity and messaging. I consistently infuse each project I undertake with passion and a commitment to excellence, while also actively contributing to corporate growth goals.

## SELECTED PROJECTS

### Kin-up - A Wellness app

Personal Project - Mobile app [link](#)

Once started as a bootcamp assignment is now a fully fledged Hi-fi prototype. It's a wellness app project that leverages Artificial Intelligence integration with emphasis on micro interactions. The goal was finding a solution that retains client's customers while promoting healthier habits to reduce stress levels.

### DesignHotels.com - UX redesign

Bootcamp Project - Website [in progress](#)

A fast paced project with a focus on usability and iterative user testing. As a UX/UI designer I leveraged my skills to deliver fast iterations following user testing and a pixel perfect hi-fi prototype. The goal was to provide an alternative solution the hotel product pages in full respect of the branding, and by listening to user's feedback it's considered a dramatic improvement.

### 595° - rebranding

Heimat TBWA - Brand identity, communication strategy, website [link](#)

A complete rebrand to face the rapidly changing global market of automotive and aviation. From communication strategy to corporate identity, from brand imagery to booth design, I oversaw every aspect of the project to deliver a consistent online and offline presence.
